## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 1\_Q2

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. PROBLEM STATEMENT:**

Dave got two students who wants help with their doubt. Each handouts an integer and wants to find if one Integer Positive While the Other is Not Divisible by 3. Write a program to achieve this and conclude for them.

##### ***Input Format***

The first line of input represents the first integer.

The second line of input represents the second integer.

##### ***Output Format***

The output should display as "One of the integers is positive while the other is not divisible by 3." or "Neither of the integers meets the condition."

Refer to the sample output for the formatting specifications.

### **Sample Test Case**

Input: 4

3

Output: One of the integers is positive while the other is not divisible by 3.

### **Answer**

```
import java.util.*;  
  
class s{  
    public static void main(String args[]){  
        Scanner ip = new Scanner(System.in);  
        int a = ip.nextInt();  
        int b = ip.nextInt();  
  
        if(a<=0 && b<=0){  
            System.out.println("Neither of the integers meets the condition.");  
        }  
        else  
        {  
            int f = 0;  
            if(b>0 && a%3!=0)  
                f=1;  
            else if(a>0 && b%3!=0)  
                f=1;  
            else  
                f=0;  
  
            if(f==1)  
                System.out.println("One of the integers is positive while the other is not  
divisible by 3.");  
            else  
                System.out.println("Neither of the integers meets the condition.");  
        }  
    }  
}
```

**Status : Correct**

**Marks : 10/10**
